```
1 {  
2     "responseCode": 405,  
3     "message": "This request method is not supported."  
4 }
```

The screenshot shows the Postman interface with the following details:

- Method:** PUT
- URL:** https://automationexercise.com/api/productsList
- Headers:** Authorization, Headers (7)
- Body:** JSON (empty)
- Test Results:** 200 OK, 975 ms, 875 B
- Response Body:**

```
1 {  
2     "responseCode": 405,  
3     "message": "This request method is not supported."  
4 }
```

The screenshot shows the Postman application interface. At the top, a 'POST' method is selected, and the URL is set to `https://automationexercise.com/api/searchProduct?search_product=tops`. A blue 'Send' button is visible on the right. Below the URL, the 'Params' tab is active, showing a table with one row where 'search_product' is set to 'tops'. The 'Body' tab is also present. In the bottom section, the response status is '200 OK' with a response time of 789 ms and a body size of 887 B. The response body is displayed as JSON:

```
{ "responseCode": 400, "message": "Bad request, search_product parameter is missing in POST request." }
```

POST https://automationexercise.com/api/searchProduct?search_product=
